

DURO-LAST.
THE WORLD'S BEST ROOF.

QUICK-PULL® ROOF PULLER

Removeable contact foot with grip teeth.

The Quick-Pull® Roof Puller is designed to align Duro-Last® membranes on the rooftop and assist in pulling deck sheets taut, providing a smooth finished installation. This updated tool utilizes a cable and pulley system and features an adjustable lever as well as a slip resistant contact plate on the bottom, allowing for use directly over an installed membrane when necessary. Also new on the Quick-Pull model is an optional contact foot with teeth, which can be attached when more grip is needed.

Built-in rods connect to vice grips, allowing for pulling near parapet walls and obstructions such as rooftop units.

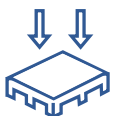

Ergonomic stand-up design reduces repetitive motion stress and fatigue on rooftop crew.

Removeable contact foot allows for use of tool directly over installed membrane.

Minimal moving parts reduce cable wear and tear, ensuring long-lasting performance.

Use of contact foot with teeth provides more grip when needed, while optional rooftop anchoring provides optimal pulling leverage.

Designed with spring to hold handle out of the way when not in use for easy handling and storage.
