

Now you see it.

Now you don't.

The leaky roof, that is.

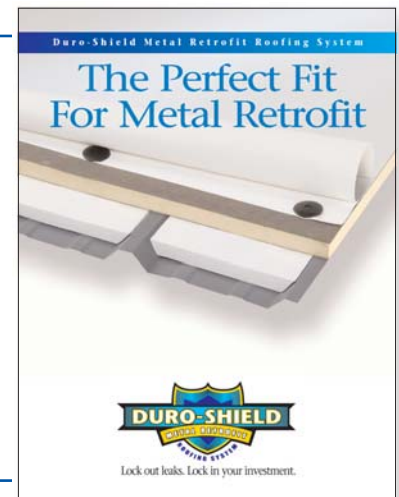

Magic? No—it's the Duro-Shield® metal retrofit roofing system.

Chances are, if your roof is more than a few years old, you've learned a lot about rust, leaks, and expensive repairs. Instead of patching your aging metal roof again — or replacing it with another expensive metal roof, consider a durable protective shield: the Duro-Shield roofing system.

The Duro-Shield system can be installed right over your existing metal deck, without an expensive tear-off. It's a flexible, prefabricated membrane that provides long-lasting, watertight protection.

— The Duro-Shield roofing system is: —

- A complete roofing system, not merely a patch or coating.
- Custom fabricated to your building's rooftop specifications.
- Energy-efficient.
- Leak-proof and virtually maintenance-free.
- Resistant to chemicals, fire, and high winds.
- Clean, safe, and non-disruptive for installation throughout the year.
- Protected by the industry's best warranties.

Call or visit our web site to order our free booklet.

**No smoke, no mirrors.
Just the perfect fit for metal retrofit.**
