AIA/CES Registered Provider Program Summary Handout

Provider: Duro-Last Roofing, Inc. **Program #:** STD001

Program: One-Hour Roofing Fabrication Facility Tour

Length: 1.0 hour

Credits: 1.0 LU Hour **HSW:** Yes **SD:** No

Description:

Guided tour of a roofing system fabricating facility. Includes a summary of the manufacturing processes, quality checks, inspection procedures, and testing performed within the facility to conform to UL, FM and regulatory codes.

Learning Objectives:

At the end of this presentation participants will understand the processes involved in manufacturing a custom pre-fabricated roofing system utilizing a thermoplastic roofing membrane and its components.

How taught:

This program is a walking tour performed by an in-house expert on manufacturing operations. Interactive participation utilizes on-site observation, material samples and demonstrations to enhance the learning experience for participants.

A/V needed: N/A

Target Audience:

Architects, engineers, specifiers, building owners, building managers, contractors, or other design and construction professionals. Ideal audience is 6 – 10; however, larger or smaller groups may be accommodated. The experience level will be assessed ahead of time to accommodate the participants.

Facilitator Qualifications:

All Duro-Last presenters are trained in the CES guidelines and presentation skills in addition to the training and expertise they have in the subject area specific to the program.

Costs: No Charge.
