

The American Institute of Architects Continuing Education System

AIA/CES Registered Provider Program Summary Handout

Provider: Duro-Last Roofing, Inc. **Program #:** STD003

Program: Three Hour Saginaw Facility Tour

Length: 3.0 hours

Credits: 3.0 LU Hours **HSW:** Yes **SD:** No

Description:

Guided tour of a roofing system manufacturing complex. Includes a summary of the entire manufacturing process from knitting to film calendaring to membrane lamination to custom fabrication. Includes a tour of the lab facilities and a review of the quality checks, inspection procedures, and testing performed in order to conform to UL, FM and regulatory codes. A conference room session describes the theory, rationale and application of the roofing system.

Learning Objectives:

At the end of this presentation participants will: 1) understand the processes involved in membrane manufacturing and custom pre-fabrication of a roofing system; 2) understand some of the laboratory testing and inspection procedures required; 3) have a basic knowledge of system installation.

How taught:

This program includes a walking tour performed by in-house experts in processing, laboratory and manufacturing operations. Interactive participation utilizes on-site observation, material samples, program handouts, video and demonstrations to enhance the learning experience for participants.

A/V needed: N/A

Target Audience:

Architects, engineers, specifiers, building owners, building managers, contractors, or other design and construction professionals. Ideal class size is 10 – 15; however, larger or smaller groups may be accommodated. Tours are typically divided into groups of 6 – 10. The experience level will be assessed ahead of time to accommodate the participants.

Facilitator Qualifications:

All Duro-Last presenters are trained in the CES guidelines and presentation skills in addition to the training and expertise they have in the subject area specific to the program.

Costs: No Charge.
