

**The American Institute of Architects  
Continuing Education System**

AIA/CES Registered Provider Program Summary Handout

**Provider:** Duro-Last Roofing, Inc. **Program #:** STD007

**Program:** Rooftop Jobsite Tour

**Length:** 1.0 hour

**Credits:** 1.0 LU Hour **HSW:** Yes **SD:** No

**Description:**

Guided tour of a Duro-Last roofing installation in progress. Includes demonstrations of deck sheet, insulation, flashing, and accessory installations on a rooftop.

**Learning Objectives:**

At the end of this presentation participants will: 1) understand the general procedures for installing the Duro-Last roofing system on a specific project in progress; 2) be familiar with some of the issues and challenges that are faced by roofing installers and the impact those issues can have on the selection and performance of a roofing system.

**How taught:**

This program is a site tour facilitated by an in-house expert. Interactive participation utilizes on-site observation and demonstrations to enhance the learning experience for participants. Participation may involve climbing on ladders and/or negotiating roof access openings.

**A/V needed:** N/A

**Target Audience:**

Architects, engineers, specifiers, building owners, building managers, contractors, or other design and construction professionals. Ideal audience is 6 – 10; however, larger or smaller groups may be accommodated. The experience level will be assessed on-site to accommodate the participants.

**Facilitator Qualifications:**

All Duro-Last presenters are trained in the CES guidelines and presentation skills in addition to the training and expertise they have in the subject area specific to the program.

**Costs:** No Charge.
