

Bring New Life to Old Roofs

Duro-Shield™ Roof Coatings Revitalize
the Life of Your Roofing Investment

Duro-Last[®] offers solutions for all of your roofing needs, including roof coatings and materials. Duro-Shield products are designed to help protect and revitalize the performance of commercial roofs.

With constant exposure to heat, cold, UV radiation, rain, snow, hail and high winds, a roof can be the most vulnerable component of a building's exterior.

However, a roof's long-term performance can be enhanced – and major roofing problems avoided – with correct design, quality materials, proper installation and workmanship, and comprehensive care.

The cost of routine care is minimal when compared to the cost of repairing, removing and replacing a damaged roof. Duro-Last offers an entire line of products dedicated to helping you revitalize the life cycle of this critical asset.

Duro-Shield Silicone is a silicone-based roof coating designed to resist natural weathering while providing long-lasting watertight protection. Its brilliant white finish offers superior reflectivity and energy savings, and additional color options are available to meet a variety of aesthetic needs.

When properly prepared and applied, following Duro-Last specifications, Duro-Shield Silicone can be used on the following roof substrates:

- Single-ply membranes:
 - Aged Duro-Last PVC (polyvinyl chloride)
 - Other aged PVC's
 - EPDM (ethylene propylene diene monomer)
 - TPO (thermoplastic polyolefin)
- Spray-applied polyurethane foam
- Mineral and granule-surfaced build up (BUR) and modified bitumen
- Smooth-surfaced built up (BUR) and modified bitumen
- Aged galvanized metal
- Concrete
- Wood

Duro-Shield™ Silicone Roof Coating

Featuring 98% total solids by volume, a minimum of 15 mils of coverage when dry, as well as 5-, 10-, 15-, and 20-Year Limited Warranty options, Duro-Shield Silicone provides a premium watertight barrier for a variety of roofing applications.

Available Colors*:

Bright White

Tan

Gray

**Official color samples are available upon request and provide the most accurate representation.*

Duro-Shield Acrylic Roof Coatings are 100% elastomeric acrylic, and are designed to seal and protect a variety of substrates with positive drainage. Their brilliant white finish reflects the sun's rays, lowering heat buildup and reducing energy costs.

When properly prepared and applied, following Duro-Last specifications, the Duro-Shield Acrylic line of roof coatings can be used on the following roof substrates:

- Single-ply membranes:
 - Duro-Last PVC
 - Other PVC's
 - EPDM
 - Hypalon® CSPE (chlorosulfonated polyethylene)
- Mineral and granule-surfaced build up (BUR) and modified bitumen
- Smooth-surfaced built up (BUR) and modified bitumen
- Metal
- Wood

Duro-Shield™ 10 Acrylic Roof Coating

With 50.3% total solids by volume, a minimum of 16 mils of coverage when dry, and 5- or 10-Year Limited Warranty options, Duro-Shield 10 provides a cost-effective option for revitalizing the performance of commercial roofing systems.

Available Colors:

Bright White

Duro-Shield™ 20 Acrylic Roof Coating

Featuring 55.81% total solids by volume, a minimum of 33 mils of coverage when dry and a 20-Year Limited Warranty, Duro-Shield 20 provides excellent coverage and revitalization to the performance of commercial roofing systems.

Available Colors:

Bright White

* All Duro-Shield coatings can be applied with a brush, roller or airless sprayer.

* 15-Year Limited Warranty is only available for Duro-Shield Silicone applications. Refer to the Duro-Shield Silicone and Acrylic Installation Guides for detailed warranty information.

More Members of the Duro-Shield Silicone Product Family

- **Duro-Shield Silicone Brush Grade Sealant** – This high-solids, non-shrinking moisture-cure silicone sealant is used for filling and patching cracks and voids on various substrates prior to application of Duro-Shield Silicone primers and coating.
- **Duro-Shield Silicone Roof Primer: Universal 2-Part Epoxy*** – Water-based 2-part epoxy that can be used as a primer over multiple substrates prior to applying the Duro-Shield Silicone Roof Coating. It is also an adhesion promoter for areas of ponding water and a bleed blocker over asphaltic roofs.
- **Duro-Shield Silicone Roof Primer: TPO*** – Manufactured from a fast evaporating solvent carrier and adhesion resins, this primer is intended to aid adhesion of the Duro-Shield Silicone Roof Coating to new and aged TPO membranes.

* Detailed primer requirements can be found in the Duro-Shield Silicone Installation Guide.

More Members of the Duro-Shield Acrylic Product Family

- **Duro-Shield Acrylic Brush Grade Mastic** – Heavy-bodied, flexible, elastomeric caulk and sealant for filling and patching cracks and voids in various substrates prior to application of Duro-Shield Acrylic Primer and roof coatings.
- **Duro-Shield Acrylic Primer** – The application of this primer is required on select substrates before using any of the Duro-Shield Acrylic roof coatings. Detailed primer requirements can be found in the Duro-Shield Acrylic Installation Guide.

Polyester Reinforcement Scrim – Compatible for use with both Duro-Shield Silicone and Duro-Shield Acrylic coatings, this flexible polyester membrane reinforces seams, flashings and penetrations. The membrane helps create strong, resilient bonds.
