

# Daylight Your World with Duro-Light<sup>™</sup> Skylights

# Cost-Effective Skylights

Duro-Light skylights are a bright addition to the Edge-to-Edge & Deck-to-Sky™ roofing solutions from Duro-Last®, Inc. Offering thick, high-density lenses, Duro-Light skylights get the job done with outstanding lighting, thermal performance, and lifecycle cost benefits.

## Air and Water Resistance

Duro-Light skylights use two systems to prevent water penetration, including advanced sealing through a robust tape and glazing application and a unique, high-performance weather seal for air and water infiltration resistance and reduced condensation. The vinyl frame provides a thermal break around the perimeter, which further reduces condensation.

Skylights are available in both acrylic or polycarbonate. Units are fully assembled with corrosion-proof screws and high-performance weather seals. These systems work together to provide exceptional performance and help protect building contents.

## Products and Glazing Options

(custom options are available)
